

# WET & DRY SUMP SYSTEMS FOR FORD "FE" ENGINES

#### **WET SUMP PANS**

#55410 Ford FE Wet Sump Pan (original 427 Cobra) 8410

All Aviaid FE oil pans are manufactured from steel and are cadmium plated to match the OEM Cobra/GT style. They incorporate internal baffling and a windage screen as required for optimum oil control

#55412 Ford FE Wet Sump Pan (front sump Mustang)

#### DRY SUMP PANS

#56412 Ford FE Dry Sump Pan (fits Cobra and GT-40) Features 3 outlets on left side

#52412 Ford FE Dry Sump Pan (fits Cobra and GT-40) Features 3 outlets on right side

#### **BRACKETS & ADAPTERS**

#59410-2 - Driver's side oil pump mount for FE with hardware and belt-tensioning shims. Also has a tap for an oil pressure gauge.

#40204-01 and 40204-02 Cast aluminum filter mount with steel mounting bracket. Attaches to cylinder head

#59410-1 - FE oil pump mount for passenger side. Use with Series 1 pump equipped with horizontal pump mounts.

#40203-1 - Billet aluminum remote filter adapter. Bolts to FE block, facilitates use of remote filter and features an oil pressure gauge tap.

### **DRIVER & PASSENGER SIDE MOUNTS**

Aviaid has developed mounts that attaché to either the left or right side of the block and allow the pump to be driven from the back side of the damper through use of a special damper sleeve for the HTD drive.

### **SERIES 1 & SERIES 2 PUMPS**

We offer 4-stage pumps in the standard Series 1 and higher performing Series 2 configurations. These include three scavenging and one pressure section. Pump choice is relative to engine displacement and modifications. Both right and left side mount setups are offered.

Note: Single Stage external wet sump pumps available.

## **DRIVE KITS**

#109 50030 Cobra tank FE drive includes a special damper sleeve, pump pulley and HTD belt.

**TANKS** 

Our original style Cobra tank is a recreation of the tanks built for early dry sump cars. The original cars had special right side header and fender openings moved forward to allow for clearance. Aviaid also offers standard 6" diameter by 25.5" tall (2.5 gallon capacity) and compact 9" diameter by 18" tall (3 gallon capacity) dry sump tanks.

#59410-01- Fuel Pump/Power
